

## SWOP POLES FOR PUMP WITH THE NEW WALLET-FRIENDLY EASY CAMP INFLATABLE DRIVE-AWAY AWNINGS

The new Easy Camp AirUp Motor range of inflatable drive-away awnings offers the convenience of air technology and famous Scandinavian fashion that sees form follow function, at a price tag that appeals to those wanting to swop poles for pump without an eye-watering hit to the wallet.

Fast and easy to pitch using the supplied manual pump, the range adds versatility and extra room with standing height throughout to

campervans and MPVs with attachment range of 180cm-205cm, without taking up a vast amount of valuable space and weight in a small vehicle.

The range comprises the tunnel Guard Air (pictured right) with protective front porch, and dome-style Podium Air (pictured below left). The models weigh only 17kg and 11.9kg respectively with a packed size of just 80cm x 35cm and 75cm x 32cm to address storage and transportation problems.

AirUp drive-away awnings are made from PU-coated polyester with a 3,000mm hydrostatic head and carefree pitching with a secure, snug fit is provided by air tubes with two-layer protection and Air in/Air out valves.

Features include a front D-door and side access for the Guard Air and a traditional straight zip front door for the Podium Air – the sewn-in lie-flat groundsheet prevents tripping. Both models have large rear door access to the unit. Ample windows and air vents keep inside bright and airy, with curtains to maintain privacy when needed. Optional extras include carpets for under foot comfort.

AirUp Motor drive-away awnings complement the Danish brand's popular Motor Tour range of poled drive-away awnings that comprise evolved Wimberly, Shamrock and Fairfields with attachment heights between 180cm – 205cm, and new Crawford (pictured right) and Canopy. All are made from PU-coated polyester with a 3,000mm hydrostatic head and options include an inner for the Wimberly providing extra bedroom or storage space.

The Crawford is a versatile tailgate design that adds flexible space to campervans and is ideal for VW California T5/6 models. Securely pitched on the tailgate with twin

guylines and a toggle-up door with ample walk-in height easily accessed or raised as a canopy for extra shelter from the sun or rain. The Canopy (pictured left) quickly and easily pitches to make the most of days at the beach, on campsites, at outdoor events or wild camping by offering extra shelter from sun and rain.
